OPTIMIZED MANAGEMENT of your intervention sheets

Maintenance professionals

Propel your maintenance tools into the digital era.

Control tab

The mobile solution, digital and flexible to all the requirements of the maintenance area

The maintenance in the digital era

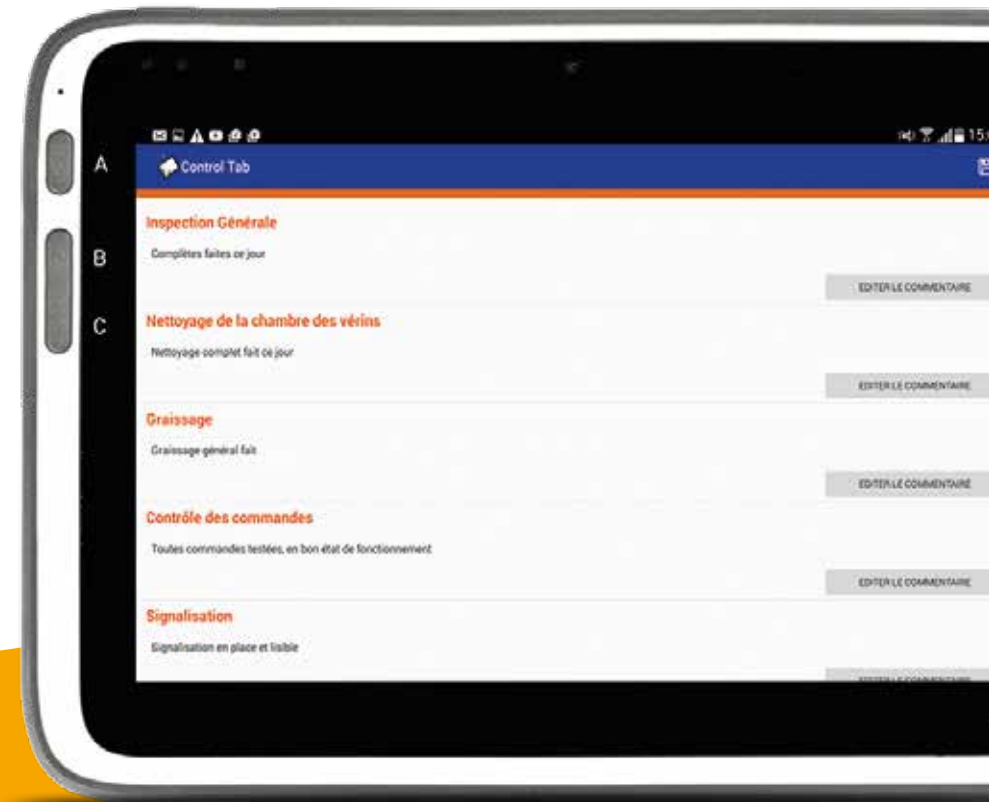

Think again about the way you are working

Intuitive. Practical. Efficient.

Equipped with **Control Tab**[®], your technicians have all the necessary information: Prevention plans, security registers, equipments and machine diagrams.

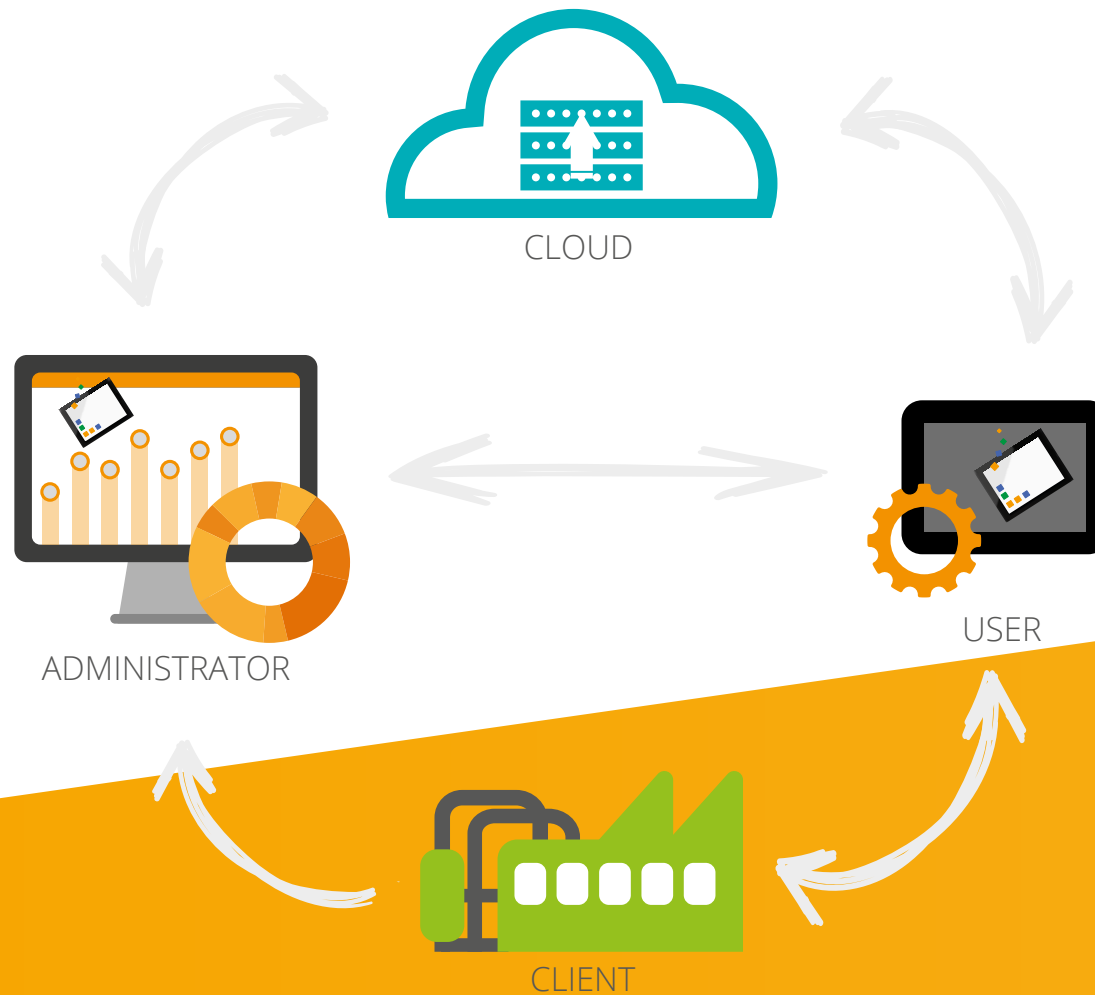

As an intuitive and flexible tool, the digitalization of the process optimizes your productivity and provides an incomparable work environment.

From the database creation up to the customer signature, **Control Tab**[®] is with you at each step.

A simple operation

A solution that meets all needs

An intuitive tool for each profile

Intervention sheets
consultations, creation, modification...

C

Customer signature
directly on the tablet

Everything is stored and managed in a secure cloud

Testimonials

Our customers talk about us

Pierangelo MIGGIANO

Chief Executive, Froid Med

Froid Med manages maintenance services in climate engineering for their customers in the PACA region. Our 6 technicians, always on the ground, need tools to simplify their work.

We chose the **Control Tab**® app on touchpad to save time in the management of the intervention sheets and the periodic visits.

At the administrative level, it is very easy: there is no data re-entry and less paperwork! The sheets entered on the tablet by the technician are automatically transferred to our server. Besides, with this solution, he takes with him all the customer information and technical documentation that he needs.

Our customers have a very positive perception of our new highly innovative system and set up with our partner **Dimaint** (groupe e-Fleurival). These productivity gains specially allow us to ensure a customer service even more efficient.

Our Offer

An all included package through an **annual subscription**

- ➔ **Control Tab® annual license**
- ➔ **Control Tab® annual hosting**
Performing and secured servers and datacenter, managed by our partner Edensi
- ➔ **Control Tab® annual assistance**
Maintenance and all updates in connection with the improvements of MS Windows and Android

Simplicity

The annual billing

The subscription begins on the first day of the starting up of Control Tab®. It is annually billed, and payable in advance by direct debit.

Engagement

Total freedom!

The annual subscription is automatically renewable. Possible termination at the end of the first year, at the anniversary date (with a 45 days prior notice).

Costs

Full visibility!

Our rates are guaranteed for 2 years starting with the subscription.

Additional **services***

Make **Control Tab**[®] a maintenance support as close as possible to your reality.

Integration

- Integration of your data: customers, sites, machine, etc.

Personalized forms

- Custom forms for tablets and mobile terminals
- Entry forms adapted to your needs

Customized export and reporting

- Data export, user-defined reports*
- * Some services require an initial validation of feasibility.

Training

- The trainings are performed by experienced consultant-trainers

They take place on the site or in Strasbourg (additional mission expenses charged).

Development

- Development of customized functions
- Development of additional modules specific to your activity

A team at your side

Control Tab is also an expert team with complementary skills to assess all the challenges of your needs and control all the aspects of your project.
